

## Global Warming Solutions

Dear Governor Schwarzenegger,

It's time for California to solve global warming by making a large, long-term investment in global warming solutions.

Please establish a **\$1+ billion-a-year Global Warming Solutions Fund** to invest in solar, wind, energy efficiency and other technologies that create jobs and protect public health. The Global Warming Solutions Fund should be funded entirely by **requiring polluters to pay for every ton of pollution they emit** and shifting these resources toward clean energy.

By creating a Global Warming Solutions Fund and making polluters pay, California will play a leading role in developing new technologies to solve global warming.

Sincerely,
